FOREWORD

This ebook is set up as a free resource to provide information, advice, tips and resources to people getting divorced. All of the information and its related resources within this ebook do not require you to move beyond your computer.

As I said, this ebook is free and I encourage you to pass it on to whomever you feel may benefit from it.

Web marketers, you are welcome to customize this ebook and use it as free content on your website or ezine. For more information on how to do this, [click here](#).

CHAPTER ONE - So You're Thinking About Getting a Divorce

If you are reading this ebook, then you belong to one of two groups of people:

- ✓ you're going through the divorcing process or,
- ✓ you know of someone who is.

In either case, you've made an excellent decision in choosing this free ebook because as you will find that it will provide you with tons of information, resources, tips and advice on the divorcing process.

And besides being free, what separates this ebook from all of the others found on the internet, is all the information contained within this ebook will not require you to move an inch away from your computer to access it. That's pretty darn good considering how stressful it is going through this process.

Are You Shell-Shocked by the Decision to Divorce?

I don't know of too many people who have gone through a divorce without at least some disruption to their lives. To say the least, getting divorced is unsettling. It requires that you to make decisions make changes and re-organize lots of things in your life. This may seem like an enormous task even if you are the one initiating the changes. Having to make these changes when you're not expecting them makes it all that more of a challenge.

It's very normal to feel stressed, anxious, sad, angry and depressed during the divorcing process. These feelings can go in cycles and at times they tend to cluster together. Sometimes people describe themselves as being on an emotional rollercoaster - feeling up one

moment and down the next.

You need to know that this is a quite common experience for people going through a divorce. It is an emotionally trying time and people's ability to cope is often stretched to the max. The good news is that for most people going through divorce, this difficult time is usually short lived and does pass.

CHAPTER TWO - Should I or Shouldn't I? I Can't Make Up My Mind!

Are You Still In Doubt?

If you feel confused and a bit frightened about the prospect of ending your marriage, then once again - you are not alone but in good company.

Most people contemplating divorce experience times when they vacillate between “biting the bullet” by starting divorce proceedings and “sticking it out” by staying in the relationship. This is perfectly normal, Contrary to popular belief - or actually the perceptions of those whose spouses have left them - the decision to leave a relationship is a very difficult one to make. Very few people impulsively decide to walk out on their marriages.

Ending a relationship is not easy. Aside from the emotional investment people make, there are other considerations like children, homes, cars, savings, bills, pensions to keep in mind. Unraveling a marriage, especially one that is longstanding is a challenge to say the least. And what makes the process even more difficult is having to make important decisions at a time when you're feel most vulnerable, stressed and emotionally drained.

It's always difficult to know for sure if you are making the right decision. What may feel “right” one day, may seem “wrong” the next. To help you in your important decision making, I strongly recommend that you read Karl Augustine's ebook, [**A Practical Guide to Deciding Whether or Not To Get a Divorce.**](#)

Karl tackles the most important issues in making this important decision such as:

- ✓ The Mindset You Need to make this Important Decision

- ✓ Why Marriage is Tough No Matter Who You Are
- ✓ The Supreme Value of Having Confidence in Yourself
- ✓ Are You Letting Other People - Your Kids - Influence Your Decision Making?

Karl also provides “Action Items” throughout the book. These are designed to get the reader to think and then DO something about their situation.

Another excellent resource is Susie and Otto Collins’ ebook, [“Should I Stay or Should I Go”](#). This ebook is filled with hundreds of questions, stories and insights that will help the reader consciously determine whether to stay in a relationship or to move on.

Some of the things you will learn from reading this ebook are:

- ✓ Know whether you really want to stay in this relationship or move on
- ✓ Find out what you really want in a relationship and whether you'll be able to have it in this relationship
- ✓ Identify the real issues going on in this relationship (they may not be what you think)
- ✓ Understand the communication challenges going on between the two of you
- ✓ Show you how the way money is handled in your relationship may be causing major problems without you even knowing it
- ✓ Tell you what to do if there's physical, emotional or sexual abuse going on in this relationship

- ✓ Give you a new way of thinking about how addictions affect your relationship
- ✓ Identify how patterns from your past may be unconsciously ruining your relationship right before your eyes

Ending a marriage rates high on the list of “important decisions” a person has to make. Decision making at this time should therefore never be taken lightly because the consequences of a premature “wrong” decision outweigh the consequences of delaying making “any” decision.

My advice is - when in doubt, wait! Unless it is a matter of life and death, delaying your decision for 24 hours will not make a measurable difference. Alternatively, rushing into a hasty decision could be disastrous.

If you are among those who feel you want to give your marriage one last chance, Lee Baucom’s ebook, [“Save Your Marriage Even If Only You Want To Work On It”](#). I am the first to say that if a marriage can be saved, the effort should be made in that regard. As a relationship consultant, I have personally observed marriages that were already in divorce court turn around and survive. Dr. Baucom’s ebook provides useful strategies for learning how to forgive, coping with anger and learning how to communicate more effectively.

“Stop The Train, I Want To Get Off!” - How To Reverse The Divorcing Process?

I have to be perfectly honest with you. The percentage of people who start down the divorce route who successfully turn it around is very low. As I stated in the previous section, I have seen it happen so I can tell you that it isn’t impossible.

What it involves is commitment, a lot of hard work and a very good marriage counselor who really knows his or her stuff.

In my travels on the Internet I have found two resources that I feel are worthwhile looking into if you seriously want to explore the possibility of stopping your divorce.

- ✓ The first one deals with a problem that plagues many couples and is often the cause of many marital break-ups - sexual dysfunction. I am of a strong belief that most problems that show themselves in the “bedroom” have their origins outside of it. The challenge is what to do about it.

You will be able to get some valuable insights about this common problem from Dr. Atwood’s ebook, [“Hopeful Solutions to Your Sexless Marriage”](#)

Many couples lose sight of what is really important in relationships. Although they get married for all the right reasons like wanting companionship and an opportunity to build a life together, too often once they take their vows, they get side-tracked by their careers, children, financial concerns. Consequently, their relationship begins to take a backseat and a rift starts developing. Without their knowing the underpinnings of their relationship erode.

- ✓ [“Saving Your Marriage with Love, Trust and Commitment”](#) by Emanuel Fox and Raquel Fox helps people get back to the important cornerstones of relationships even if they have strayed far from each other.

CHAPTER THREE – Dealing With Infidelity

And What If There's “Another” Man or Woman?

It's hard enough to get your head around ending a marriage when there are just you, your spouse and your children. Add to the mix a bit of infidelity and you will put a whole new twist on the situation. Whether you are the “cheater” or the “cheated”, the presence of another relationship will undoubtedly not only raise the threshold on upset feelings (and that's putting it mildly), but it also has the potential for making the divorcing process be that much more difficult.

For the “Cheater”

If you are the one who is involved with someone else (i.e., having an extramarital affair), then I strongly advise that you place this new relationship on hold until you sort out your marital situation. I say this for two very important reasons:

- ✓ First, it next to impossible to sort out your feelings about your spouse and marriage (and your future) when there is someone else in the “wings”. You need to be able to assess whether your marriage has a future by assessing it based on its own merits - and not because there is a better option with someone else.
- ✓ Second, and more importantly, if your spouse learns that there was someone else in the picture while you were supposedly “working on your marriage”, this will surely add resentment, anger and hostility to the divorcing process – again, making it that much more difficult and stressful.

I've written [“The Anatomy of An Affair”](#), an ebook which provides some interesting insights into why affairs begin in the first place. Basically, it operates on the premise that most affairs are not about sex. Instead they occur because there is a flaw in the relationship. In other words, at some point one or both spouses realize that “needs”

are not being met. Although this idea may infuriate those who find themselves on the receiving end of infidelity, it nevertheless makes the point that “good” marriages are rarely at risk for infidelity.

For the “Cheated”

If you suspect that your spouse may be having an affair, then it is important that you find out what is really going on. Having unverified suspicions that drag on and on only adds unnecessarily to feelings of ill will and stress. And should there be no basis for your continued suspicions, this in itself could very likely ruin a marriage as easily as infidelity.

No doubt the easiest way to get to the truth of the matter is for your spouse to provide you with the “straight goods” on what is going on. However, often times this just does not work either because the spouse’s denial of the affair is not believed or the cheating spouse is simply unwilling to fess up. This then leaves the onus on you to get the information you need to confirm or dispel your suspicions.

Edward Talurdey’s ebook, [“The Art of a Cheat”](#) helps readers get the answers they need. His strategies and techniques will get you the evidence you will need to once and for all allay your concerns. He outlines some telltale signs of infidelity such as sudden changes in behavior, cell phone records and credit card charges that don’t add up.

CHAPTER FOUR - Ready To Move Forward

Developing A “Plan of Action“

Believe it or not, most people contemplating divorce tend to focus on getting away from the arguments and all of the other aversive things in their relationship and miss a whole lot of very important issues with long term consequences. Often the desire to escape the acrimony, leads people to make very poor decisions such as walking away from child support or an equitable financial settlement.

If this is where you are at, you need to continue reading and pay attention to the following list of things that need to be taken into consideration before you speak to your spouse about ending your marriage.

FREE: IMPORTANT INFORMATION

Here are some of the things people do during the divorcing process that cost them a lot of money:

- ✓ They under-estimate their spouse's reaction to the divorce - they fail to recognize how upset their spouse really is
- ✓ They assume that being reasonable and conciliatory with an unreasonable spouse will lead to an equitable settlement
- ✓ They erroneously believe that the court will provide justice
- ✓ They erroneously believe that the divorce laws which espouse equity will prevail

Continued....

Continued...

- ✓ They do not provide their attorneys with realistic or factual information about their situation
- ✓ They fail to understand that with divorce new boundaries need to be established - that things change when a couple separates and when divorce proceedings begin
- ✓ They sabotage their attorney's efforts to represent them effectively by sharing information with their spouse, by not allowing the attorney to word documents in a particular way or by not following through with attorney's advice
- ✓ They fail to provide clear and ambiguous instructions to their attorneys
- ✓ They erroneously believe that they do not need to be actively involved in their case

Recently, Michael Daniel and I co-authored the ebook, ["How to End a Marriage"](#). It details 21 essential steps involved in this process. Here are just a few of the sub topics covered in the ebook:

- ✓ The Three Risk Factors in Divorce
- ✓ Getting Over Guilt
- ✓ Fear of What People Might Think
- ✓ Getting Off the Emotional Roller Coaster Ride
- ✓ Discover the Rules of Making Good Decisions

- ✓ Understanding the Divorce Process
- ✓ Getting Divorced Without Losing Your Shirt

Here's a sample of what you will read in our ebook - ["How to Cope When Your Spouse Goes Ballistic With the News That You Are Leaving"](#)

Getting Divorced Can Be Expensive - So Being Prepared is Essential!

I can tell you that there is no absolute way to guarantee that your divorce will go smoothly or without a hitch. However, I can also tell you that there things people do that almost always guarantees that they won't. I am here to help you lessen the chances of things going badly.

First of all, did you know that a contested divorce could easily cost you \$30,000 or MORE?

Are you shocked? Don't be.

Think about it - the average hourly fee for a divorce attorney is \$175. When you consider that you will be charged for every moment an attorney works on your file (doing research, preparing documents, making phone calls, communicating with the opposing attorney, dictating letters, reviews correspondence and court documents, meetings), you can start to see how quickly a legal bill can be run up.

If you are interested in saving yourself a bundle of money in your divorce, then you will be interested in reading Michael Daniel's ebook, ["How To Legally Save Yourself Thousands of Dollars on Your Divorce"](#). As a co-author of one of my own books, I know that Michael is an impeccable researcher and his material is superb.

Here are just a few of the topics Michael covers in his ebook:

- ✓ What is the most effective techniques to finding a GREAT lawyer?
- ✓ What should you watch out for when you first meet your lawyer?
- ✓ Three things make the biggest difference to your divorce costs. And what to do about them?
- ✓ What does your lawyer NOT want you to find out? And why should you find out anyway?
- ✓ Why are divorce costs often under reported?
- ✓ Discover some amazing things your lawyer WILL charge you for?
- ✓ Charges you would be crazy not to know about before hand.
- ✓ What should you NEVER discuss with your lawyer? It's not what you think!

There are two other ebooks that I think are worth mentioning, mainly because they are written by attorneys and they each provide advice from a legal perspective in a way that a consumer can understand. Both these attorneys offer their legal expertise as well as years working with divorcing clients to inform them about what they need to know about getting divorced.

Here is a very worthwhile ebook written by an attorney. [**"The Tao of Divorce"**](#) by Stephen Fuchs gives you the straight goods based on years of experience representing divorcing clients. You will learn how to survive the divorcing process by preparing yourself effectively for the often stressful and grueling challenges associated with the legalities of divorce. This ebook is worth its weight in gold and costs just a fraction of what you would pay for a consultation with a lawyer.

[**The Divorce Primer: Divorce Basics for the Consumer**](#) is another excellent book written by an attorney. Jean Mahserjian, a divorce and family lawyer helps make sense of what the divorcing process is. In very plain and non legalistic language she demystifies what is involved in getting divorced. I really like the ebook because it offers people options at a time when having choices are most appreciated.

FREE TIPS ON PREPARING TO SEPARATE

Take an inventory of your personal and joint assets and liabilities (don't assume that you will have another opportunity to do so once you are out of the home)

Get a handle on your personal and joint finances (get a list of bank accounts, credit cards, stocks, investments etc.)

Arrange to take your name off your spouse's credit cards

Develop a realistic budget to carry you during the next few months

Arrange for a preliminary consult with an attorney

Realistically assess the level of acrimony in your divorce - this step is critical because if you under-estimate things, it could cost you thousands as well as your relationship with your children

Consider your future living arrangements - unless you are the one planning to move out of the family home, consider having Plan A & Plan B - don't assume that your spouse will necessarily agree to your wanting to remain in the home

Only after you have done the above, should you consider telling your spouse that you want to end your marriage.

CHAPTER FIVE - Getting Started

Understanding Your Divorce Options

There are two basic ways your divorce can play out:

- ✓ Amicably, or in a
- ✓ Dragged our fight in court

Clearly, it's in everyone's best interest to settle a divorce quickly, reasonably and in a cost effective manner. However, this is not always the case because peoples' emotions, greed and desire to retaliate often get in the way. Unfortunately in the end, the only ones who benefit from a protracted court battle are the attorneys who invest considerable time arguing issues in court that could otherwise be settled through rational negotiations.

While it is not always possible to avoid court - particularly when your spouse may be taking a very unreasonable position on things, there are two options that are gaining increasing popularity in divorce law. These are [Mediation](#) and [Collaborative Divorce](#). Both utilize the principle of negotiation as well as a genuine desire to avoid court as a method of resolving differences. If you feel that you and your spouse are candidates for either of these approaches, I strongly urge you to consider them as alternatives to going to court.

Finding An Attorney

Next to arriving at the decision to divorce, the next most critical step in the divorcing process is finding the right attorney. While the saying "you get what you pay for" applies in many situations, I am of the belief that when it comes to attorneys, getting the highest paid attorney may not always be the best option. Clearly, if you have a complicated financial situation, you need to have an attorney who is

experienced in dealing with large settlement cases. In these situations, you don't want to have an attorney fresh out of law school handle your affairs.

I usually suggest to clients to call around and speak to a few attorneys before making the decision to retain one. It is also good to get feedback from friends and relatives who have gone through a divorce. With the divorce rate approaching 50% there is a real good chance that you will know a number of people who have gone through the process. Unless you have no assets, equal paying jobs and no kids, then you will want to have a divorce attorney (rather than a general attorney) represent you.

To help get you started, here are several directories where you can find a divorce attorney in your area:

- ✓ [Respond Legal](#)
- ✓ [Divorce Lawyers](#)
- ✓ [Divorce Interactive](#)

Don't feel in a rush to retain the first attorney you speak to. It may be wise to "interview" (yes interview - you are the boss here) two or three attorneys and then decide which is the best one for you. One thing to consider is how the two of you actually hit it off. You will be spending considerable time with your attorney as well as shelling out considerable money for his or her services. It is therefore critical that you establish a good working relationship together and feel confident that this individual can represent you effectively. If you have any concerns in this regard, continue shopping around until you are satisfied.

One other important consideration in selecting a divorce attorney is their approach to divorce. At one time the only solution to a contested divorce was to "litigate" - or in other words, fight it out in court. Today,

there is another option called “Collaborative Divorce”.

SURVEY FINDINGS

In a recent survey I conducted on a two large divorce online forums the overwhelming majority (78.4%) of respondents indicated that a lack of understanding of the divorce process was one of their TOP CONCERNS!

To help you in your decision making process you may be interested in reviewing my e-Report, [“Your Divorce, Your Attorney & You: Getting It Right From the Start”](#).

Educating Yourself

If you are like most people getting divorced, this is probably your first (and hopefully - your only) time that you are going to go through the process. And unless you are an attorney, you probably know little about how to get divorced or how it will impact on your life and that of your children.

It’s essential that you educate yourself appropriately about all the things you need to know about getting divorced. One place to start is by going to [Divorce Directory](#). This broad based directory of 100 divorce service providers is listed by popularity. I am sure you will find some excellent information at this website.

There are also a number of other websites dedicated to divorce that serve as excellent resource bases for selecting attorneys by region, child support tables, and divorce forms.

✓ Check out Millennium Divorce’s [Divorce Forms](#). These are

invaluable resources that are categorized by state. By using them you will save time and money when it comes to settling your divorce - even if you have retained an attorney. This is a way you can be proactive and take charge of your divorce

- ✓ Check out www.divorcesource.com. You will be absolutely amazed at the range of resources this one website has. You will find referral lists for attorneys across the U.S.A. and Canada, divorce forms and a mortgage, income and child support calculators. The nice thing about this website is much of the information is available for free!

Learning About the Divorcing Process

There is a lot to know about getting divorced. Unfortunately, most people don't take the time to familiarize themselves with what is involved because they are usually emotionally taxed when the bottom falls out of their marriage. As well, people in this state tend to rely on their attorneys to guide them along. While attorneys are certainly well versed in the law and legal procedure, they frequently fail to recognize their clients' anxieties and need to be better informed about the divorcing process.

Understandably, the divorcing process is foreign to most going through it. The most common areas of confusion for clients are as follows:

- ✓ The different steps involved in litigating a case & why things take so long to happen
- ✓ The experience of going to court - what is involved
- ✓ Preparing oneself for going to court

- ✓ Different options in negotiations & why being reasonable does not always work
- ✓ The tactics (and reasons behind them) as used by attorneys to stall or frustrate the process
- ✓ Arriving at a settlement
- ✓ Realizing that the final settlement is far from what was originally expected and why that happens
- ✓ Coping with the increased acrimony caused by the divorcing process
- ✓ Finding ways to pay legal fees
- ✓ Learning how to gain control over the process and finding ways to work most effectively with the attorney

FREE TIPS ON DEALING WITH THE STRESS OF DIVORCE

- ✓ Try to contain your worry - don't let your worry and upset rule you and consume your entire day - learn how to compartmentalize your life so that you have the energy and presence of mind to enjoy the more pleasant parts of your life
- ✓ Find activities that give you pleasure and make time to do these things.
- ✓ Exercise is a great stress reliever - it also has the benefit of making you healthier, stronger and leaner
- ✓ Surround yourself with supportive people - those who care about you and are willing to be non-judgmental.
- ✓ Invest in a good therapist or a parenting and [divorce consultant](#) (more about this later).

Having worked with hundreds of divorcing families over the years and being aware of their concerns, I realized that there was a huge gap in the information available for people going through divorce. I also realized that they were not getting the information from their attorneys and it was also likely that they were too overwhelmed to seek out the information in a book.

SOMETHING TO THINK ABOUT!

Of the 407 top divorce-related search terms, 242 (or 59%) of them pertained to children and/or parenting following divorce.

So I came up with a solution that I think is quite appealing to people who need the right information in a fast and easy way. I put on my thinking cap and put together an e-Course entitled, [**“Divorce 101: Things You Are Unlikely to Hear From An Attorney”**](#). The nice part about it is that it is available as a downloadable audio file. This means that there is no reading involved - just listening to an audio version of an e-Course that answers questions to divorcing clients' major concerns. It's really a “no brainer” and extremely helpful.

CHAPTER SIX - When Kids Are Involved

FREE MINI-COURSE!

I've produced a seven part minicourse entitled, "Arming Yourself for Your Custody Battle". It's loaded with lots of useful information about how to cope with this challenging situation. [Click here](#) to sign up. Just type "subscribe" in the subject line.

In divorce, children are high stakes commodities. Sounds cruel? You bet it is! And just for the record, custody disputes are on the rise. The obvious question is why?

The answer is rather simple. Most custody battles are not about children. They are about money and/or revenge. This is how it works...

Children are highly valued by most parents and parents feel extremely vulnerable at the thought of losing their children or their love. On the other hand, money is also highly valued and people feel vulnerable at the thought of losing it. Is this starting to make sense?

Children and money are two highly valued assets. If one is being threatened, the best way to defend against losing it is to attack the other. So, if a parent is fearful that he or she might be "taken to the cleaners", the best way to protect oneself is to use the children as a "bargaining point" or "pawn".

On the other hand, a spouse may feel betrayed by his or her spouse leaving the relationship (particularly for someone else). When this happens, the embittered spouse often retaliates by punishing the other spouse by alienating the children.

Both these situations are regrettable and more importantly they are heartless and selfish. In situations when children are thrown in the middle of their parents' dispute and are exposed to the details of their parents' conflict, it can be down right abusive.

Although these situations are thankfully not the norm in divorce, they do exist in increasing numbers. A quick search of the Internet will produce hundreds of websites offering resources for parents struggling with custody battles.

There are lots of divorce forums on the Internet. Some are better than others. Here is a list of the ones I feel are worthwhile having a look at because they provide more than a venue for people to vent:

- ✓ [Divorce Strategy Central](#)
- ✓ [Separated Parenting and Access Resource Center](#)
- ✓ [Other Divorce Discussion Lists](#)

Visit these groups and others. Many will allow you to read their posts before joining. Once you've had a look around, you will be in a better position to decide which ones best meet your needs.

FREE TIPS ON SELECTING A DIVORCE DISCUSSION GROUP

Aside from determining if the group content is for you, here are two things you should keep in mind when selecting one:

- ✓ Is the group moderated?
- ✓ Are there rules about posting and general conduct?

These two conditions are generally signs of a better quality discussions forum and one you will likely enjoy and benefit

Parenting and Divorce Coaches

It may seem a bit bizarre and unnecessary to hire someone to coach you how to parent especially since this is something you've done on your own for sometime. But as I stated earlier, divorce is a stressful and challenging time of life.

Just as important - most divorcing parents are ill-prepared for the changes, concessions and compromises that accompany ending a marriage. It would be wrong to assume that the way things were before (i.e., sharing of responsibilities, decision making, involvement and finances) will remain the same following a separation. In many cases, under involved parents become more involved and in other cases, involved parents become less involved. In some unfortunate cases, some parents simply walk away from their parental involvement and responsibilities.

To help parents adjust to new parenting arrangements, there is an emerging specialty called "parenting and divorce coaching". These individuals have professional backgrounds in psychology, family therapy or social work but more importantly, they are also trained and experienced in the areas of divorce, family dynamics and child development.

Parents who have used the services of parenting and divorce coaches have found it is a cost effective way to work through some of the difficult challenges that accompany divorce with someone who is highly skilled. To learn more about parenting and divorce coaches [click here!](#)

Parenting Plans

One of the most critical aspects of settling a divorce when children are involved is developing an effective and workable parenting plan. In spite of its importance parenting plans are often overlooked or not

given the attention they deserve.

A parenting plan is a blueprint for how both parents will provide care for their children as two individuals who no longer share the same home. A well developed parenting plan deals with much more than time sharing arrangements. And most importantly, a parenting plan takes into account the changing needs of children as they grow and mature.

FREE PARENTING PLAN TEMPLATE

I developed a [parenting plan template](#) that you are welcome to download for your own use or share with others who may also benefit from it.

This parenting plan template is easy to use and will guide you through the steps needed to address the important aspects of your parenting role.

You will find it to be a very useful tool in settling your divorce even if you are caught in a custody dispute.

Custody Evaluations

As the number of custody battles continues to rise, so does the number of custody evaluations being ordered by the courts. As a matter of fact, you can almost be certain that if you and your ex are unable to come to terms on how you are going to parent your children post divorce, then the judge will order a custody evaluation.

Custody evaluations are very detailed and thorough assessments of a family. Their purpose is to determine what type of parenting arrangement will best meet the needs of the children involved. A

custody evaluation will make recommendations about whether there should be sole or joint custody, with whom the children shall reside as well as the type of access for the noncustodial parent. It may also address issues regarding a parent's desire to move the children to another jurisdiction and away from the other parent, matters of religion and concerns about parental competency.

Custody evaluations are generally conducted by psychologists, social workers or family therapists who have received training in conducting custody evaluations. Often times, the evaluations include psychological testing by a registered psychologist. Most parents who have been through a custody evaluation find the experience to be extremely stressful and anxiety provoking. After all, it's pretty unnerving to have someone else may comments about your ability to parent!

FREE TIP ON SELECTING A CUSTODY EVALUATOR

The best way to get a feel for the types of recommendations a custody evaluator may make or any biases he or she may have is to obtain copies of previous reports submitted to the court. Any filed in court is public record and can be a accessed by anyone.

If you seem to be heading toward a custody evaluation, then it is best to do your homework ahead of time. Although there is no way to guarantee the outcome of your evaluation, there are some definite tips about how to gain an edge in the process. A great starting point in educating yourself is by becoming familiar with the [**“Guidelines For Custody Evaluations in Divorce Proceedings”**](#). This document explains in detail the standards for how custody evaluations should be conducted.

As in any profession, there are good custody evaluators and not so good ones. By properly educating yourself, you will be able to make the best choice and not leave it up to chance. In most cases, you will be able to put forward two or three choices. Often times, the other side is unprepared. If this is the case, you will have the upper hand. If the other side is prepared, then there is still a reasonable chance that one of your selections will still be chosen.

Once a custody evaluator has been agreed upon and retained, the next step is to make sure that you are properly prepared for the process. This is where a divorce coach/consultant can walk you through the process and even give you a test run of the questions you will likely be asked. Learning how to conduct yourself during a custody evaluation and framing your responses in a way that will impress an evaluator could have significant impact on the recommendations that are made.

The decision to go the custody evaluation route is an important one. In some cases, a custody evaluation can cause more harm than good. You will find that custody evaluator's will often highlight parents' weaknesses rather than their strengths. So it is essential that you understand what's at stake and what you are getting yourself into.

FREE TIP ON WHAT TO DO DURING A CUSTODY EVALUATION

As a general rule, your primary focus during a custody evaluation should always be on the "best interests" of your children and not on pointing out your ex's flaws. Discussions about your ex should be framed as "concerns" so they won't be perceived as "bad-mouthing", vindictive or running him or her down.

I prepared an e-Course on how to prepare for a custody evaluation. It provides solid tips and information about how to effectively get through the process and gain a powerful edge on its outcome.

Some of the topics covered in the e-Course are:

- ✓ What you need to do to thoroughly check out your custody evaluator?
- ✓ How to ensure that the custody evaluator has the appropriate credentials, training and experience for your family situation?
- ✓ What are the accepted guidelines that custody evaluators should follow?
- ✓ Why the "referral questions" are so important?
- ✓ What are the different components of a custody evaluation?
- ✓ Who to choose for collaterals?
- ✓ What are the things a custody evaluator is looking for in an assessment?
- ✓ How to communicate your concerns to the evaluator in a positive way?
- ✓ What are the things you need to avoid so that you will not make a bad impression?

Coping With Children's Distress During Divorce

It is very normal for children to react to their parents' separation and impending divorce. Think about it... if you're upset and stressed out, your children will be so as well. While adults have the maturity and capacity to understand what is going on, children do not. When they see their parents upset, they respond in kind.

Even very young children (those under four years of age) react to the changes in routine. It is unreasonable to expect any child to not notice or respond to the changes that accompany divorce.

Not knowing what to do only adds to parents' stress during an already challenging time of life. Check out [**"The Divorcing Parent's Guide to Coping With Children During a Difficult Time"**](#) for some helpful insights and tips on lessening the burden for your children and yourself.

CHAPTER SEVEN - When Custody Disputes Turn Ugly!

The Case of Parental Alienation Syndrome

Parental Alienation Syndrome or PAS is a phenomenon that develops almost exclusively as a by-product of separation and divorce.

The late Richard Gardner M.D. coined the term “PAS” in the early 1970’s when he started to write about behaviors that he observed in children whose parents were divorcing. In particular, he noted that among some of these children, their once warm, loving and healthy relationship with both parents prior to divorce suddenly altered to the extent where one parent was loved and the other one was outwardly despised and rejected.

Upon further investigation, it was found that the “loved” or “preferred” parent had coerced the child into a partnership of maligning and denigrating the other parent. Therefore, PAS is a condition where one parent deliberately attempts to sever the relationship a child has with the other parent and in doing so, he or she engages the child in the vilification of the other parent.

I created a short user friendly discussion on PAS. You can read it [here](#).

Back in the 1970’s when PAS was first identified, mothers were most often reported as the parent responsible for this regrettable situation. Today, there appears to be an even split between mothers and fathers who initiate PAS in their children.

WHO IS RESPONSIBLE FOR PAS - MOTHERS OR FATHERS?

It is thought that the shift in the initiators of PAS from being predominantly an issue involving mothers to one that is now equally shared by both mothers and fathers as having to do with:

- ✓ Fathers playing a more active role in their children's lives
- ✓ The increase in dual income families
- ✓ Child support based on both parents' ability to support their children

Based on the factors just identified, you can now see how finances play into the mix. However, the more important issue regarding PAS is how it plays out in custody battles.

PAS is very controversial. You may ask, how so? The answer has to do with strong "political" underpinnings which tie into the issue of child support and who pays it. PAS quickly evolved into a gender war with two factions involved: the feminists and the fathers movements, each presenting very strong opposing views. Unfortunately, the attention given to the politics of PAS has taken away from the real issue - that children are being used by parents who are selfish and motivated by revenge and money.

Many parents are confused as to what exactly constitutes PAS. What needs to be clearly understood is that PAS goes far beyond one parent "badmouthing" the other. In true PAS, there is a campaign of denigration of the targeted parent that includes the involvement of the children in the process. The critical issue is that the children are active participants in demeaning, denigrating and rejecting the

targeted parent.

There is no shortage of PAS resources on the internet. Simply use the search terms, “parental alienation syndrome”, “parental alienation”, “PAS” or “Dr. Richard Gardner”.

How to Know If Your Children Are Being Affected By PAS?

Many parents mistakenly assume that their children are victims of PAS. AS I said earlier, the critical issue in PAS is that the children cooperate with the alienating parents in the campaign of denigrating and rejecting the targeted parent. It is much more than children’s observed loyalty and/or upset with a parent that is often observed in children following their parents’ separation.

Dr. Gardner identified the following criteria as indicators of PAS:

- ✓ There is a campaign of denigration initiated by the alienating parent and involving the children

- ✓ Weak, frivolous or absurd rationalization for the deprecation of targeted parent
- ✓ Lack of ambivalence on the part of the children for their conduct with respect to the targeted parent
- ✓ Children exhibit the “independent thinker” phenomenon - I.e., they attest to not being influenced by anyone
- ✓ Reflexive support of the alienating parent
- ✓ Absence of guilt
- ✓ Spread of animosity to the extended family of the targeted parent

What Can You Do When You Believe That Parental Alienation Syndrome?

Parental Alienation Syndrome is a very serious problem. If any of the above criteria describe your child’s behavior, then do not ignore it thinking that it will subside or go away on its own. That is not how PAS works.

Unfortunately, the alienating parent typically does not stop the process until there is formal intervention or until the children are completely alienated from the other parent - no longer requiring their input. If you believe that PAS is affecting your children, then act now - DO NOT WAIT!!

Because PAS is not well understood, many attorneys and judges lack familiarity of it and consequently, they are often not able to quickly

Identify it. In light of this, it is imperative that you do not exclusively rely on your attorney to formulate a PAS argument in court. As a parent and a client, you must provide your attorney with the

information that he or she will need to convince the judge that your children are being adversely affected by the other parent's actions.

The first step in dealing with PAS is to recognize it.

The second step is to educate yourself and your attorney.

When it comes to informing your attorney about PAS, it is best to do so with a credible, concise and readable document that summarizes the relevant issues that differentiate PAS from the normal adjustment problems seen in children of divorce.

I've prepared a fully referenced e-Report entitled [**"Children's Adjustment to Divorce: The Case of Parental Alienation Syndrome"**](#). It cites the most current theories and research on the subject and clearly outlines how PAS develops and what to do about it.

CHAPTER EIGHT - When The Dust Settles...

Even the ugliest and most acrimonious divorces do finally come to an end. And when they do, many are left wondering, is there life after divorce? And if there is, what will it be like and how does one move on?

After all the months (and for some - years) of legal wrangling, there is an almost empty feeling when it is finally over. The challenge for many is to be able to pick up the pieces, reconstruct lives and to move on. This is often easier said than done.

Because prolonged contested divorces tend to be expensive, there is almost always a significant financial hit to be dealt with once the final legal bills are dealt with. That's not to mention regrouping after the settlement figures are established.

Getting Involved in a Relationship - Again

Most separated people do not follow this advice - however, I will give it anyway. For the record, it is best to give yourself at least a year to decompress following a marital/relationship break-up. Why?

There are a number of reasons but the main one is that the stress and emotion associated with separating often clouds one's thinking when it comes to relationships. And although there is often a huge pull to be connected to someone caring, if you haven't completely closed the door on one relationship, it may cause you to get involved in another for the wrong reasons.

It is also important for people to take the time to get to know themselves and their own needs. The best way to do that is to be by themselves because it is only then, can they really get in touch with who they are - without outside interference or distractions.

Finally, if there are children, they will likely need your attention. Having a new relationship brewing will not only be a distraction but it will most certainly be a source of jealousy for your children.
